

# International Conference on “Selection Theory and Breeding Methodology”

The German Plant Breeding Society (GPZ) will organize an international meeting on selection theory and breeding methodology. The primary aim will be to bring together researchers from the public and private sector who would like to share their knowledge on plant and animal breeding methodology and learn about the latest developments in the field. With the new technologies selection theory has become more important than ever, so please follow our invitation and join us in March 2017.
